INTRODUCTION

XtremeAlerts is designed for any real-time emergency. Whenever your Institution enters into a zone of direct evacuation, snow storms, dangerous person on campus ground, suicide threat, and lots of other emergency situations - you need to be vigilant in order to handle these situations.

Key Features

- Instant notification to four different platforms with 4 clicks of the mouse (SMS Alerts, Email to SMS, Desktop Alerts)
- Instant Desktop Notification (within 10-14 seconds) to all computer stations IN network and OUT of network
- Quick notification delivery to cell phones, smart phones and blackberry via SMS gateway
- Secure Application system that runs from your own Networks
- All Emergency numbers notifications
- System usage LOG tracking with details
- Emergency Procedure Manual information
- Unlimited group creations
- Unlimited creation of alert notifications with custom messages
- Supporting Windows and Mac based Operating System Platforms
